## Sustainable Practices in Surface and Subsurface Micro Irrigation

Research Advances in Sustainable Micro Irrigation, Volume 2

Senior Editor-in-Chief: Megh R. Goyal, PhD, PE  
Retired Professor in Agricultural and Biomedical Engineering, University of Puerto Rico, Mayaguez Campus;  
Senior Acquisitions Editor, Biomedical Engineering and Agricultural Science, Apple Academic Press, Inc.

This new book, *Sustainable Practices in Surface and Subsurface Micro Irrigation*, offers a vast amount of knowledge and techniques necessary to develop and manage a drip/trickle or micro irrigation system. The information covered has worldwide applicability to irrigation management in agriculture.

Focusing on both subsurface and surface micro irrigation, chapters in the book cover a variety of new research and information on:

- irrigation water requirements for tanager, vegetables, bananas, plantains, beans, and papaya
- irrigating different types of soils, including sandy soils, wet soils, and mollisols
- new applications for micro irrigation using existing technology, such as meteorological instruments and MicroCAD
- meteorological instruments for water management and much more
